

Summary of Contents

9 The Oil and Gas Sector

p. 802

10 The Electricity Sector

p. 950

11 Renewable Energy Sources

p. 1038

12 Energy Efficiency and Cogeneration of Heat and Power in SE Europe

p. 1112

13 Energy Technology Perspectives in SE Europe

p. 1138

14 Energy Demand and Supply Projections for SE Europe

p. 1186

15 Investment Potential in the Energy Sector of SE Europe

p. 1308

16 Key Messages

p. 1352

Acknowledgements	13
Preface	14
Study Contributors	16
Authors per Chapter	17
Contributor Resumes	19
Peer Reviewers	27
Executive Summary	33

1 Introduction	38
-----------------------	----

2 Regional Economic Outlook	62
2.1 The European Economy and the SEE EU Member States	64
2.2 The Western Balkan Economies: Serbia, North Macedonia, Montenegro, Bosnia and Herzegovina, Albania and Kosovo	75
2.3 Turkey and Israel: The Economies of the East Med Countries	85
2.4 Discussion	89

3 EU Energy and Environmental Policies and Regional Priorities	92
3.1 2030 EU Climate and Energy Targets	96
3.2 Opposition from EU Member States	97
3.3 The Case of SE Europe	98
3.4 Discussion	100
• Special Focus 1: EU Energy Taxonomy	103
• Special Focus 2: EU's Recovery and Resilience Facility	106
• Special Focus 3: Decarbonisation in SE Europe	109

4 Key Regional Energy Issues	116
4.1 The Glacial Change in the Region's Energy Mix	118
4.2 High Energy Import Dependence	119
4.3 The Decarbonisation Challenge	120
4.4 The Role of Gas	121
4.5 The Role of Nuclear Power	122
4.6 RES as a Key Supply Source	123
4.7 Energy Efficiency as a Champion Energy Source	126
4.8 Energy Market Liberalization and Integration in SE Europe	127
4.9 The Energy Security Dimension	130

5 Country Profiles	142		
Albania	144	Kosovo	364
Bosnia and Herzegovina	174	Montenegro	386
Bulgaria	196	North Macedonia	404
Croatia	214	Romania	438
Cyprus	244	Serbia	470
Greece	286	Slovenia	506
Hungary	324	Turkey	532
Israel	352		

* Throughout this Study, this designation is without prejudice to positions on status, and is in line with UNSCR 1244 and the ICJ Opinion on the Kosovo declaration of independence.

6	The Peripheral Countries: Austria, Azerbaijan, Moldova, Ukraine, Italy, Slovakia, Syria, Lebanon and Egypt	572
7	Review of Legal Framework in SE Europe	590
8	Hydrocarbon Exploration and Production in SE Europe	754
9	The Oil and Gas Sector	802
	9.1 Oil Midstream and Downstream	803
	9.1.1 A Broad View of the Oil Sector	803
	9.1.2 Oil Demand and Supply	803
	9.1.3 Oil Import Dependency	823
	9.1.4 Oil Prices	824
	9.1.5 Oil Infrastructure in SE Europe	827
	9.1.6 Oil Stocks	835
	9.1.7 Oil Refining	838
	9.1.8 Biofuels in SE Europe	838
	9.1.9 The Retail Oil Market	853
	9.2 Natural Gas	865
	9.2.1 Gas Market Development in SE Europe	869
	9.2.2 Gas Supply and Gas Flows in SE Europe	882
	9.2.3 Gas Markets per Country	884
	9.2.4 Natural Gas Storage in SE Europe	922
	9.2.5 Major Gas Infrastructure Projects in SE Europe	926
10	The Electricity Sector	950
	10.1 Introduction	951
	10.2 Electricity Infrastructure in SE Europe	951
	10.3 Market structure, ownership and regulation	964
	10.4 Electricity Demand	986
	10.5 Electricity Supply	992
	10.6 Market Operation	1001
	10.7 Electric Vehicles in SE Europe	1028
	Addendum	1031
11	Renewable Energy Sources	1038
	11.1 Overview of Renewable Energy Sources (RES) in SE Europe	1039
	11.2 RES for Power Generation	1060
	11.2.1 Hydro Power	1062
	11.2.2 Wind	1069
	11.2.3 Photovoltaics	1075
	11.2.4 Concentrated Solar Power (CSP)	1083
	11.2.5 Biomass & Biogas	1085
	11.2.6 Geothermal Energy	1091
	11.3 RES for Heating and Cooling	1093
	11.3.1 Geothermal Energy for Heating and Cooling	1094
	11.3.2 Biomass	1098
	11.3.3 Solar Thermal	1103

12	Energy Efficiency and Cogeneration of Heat and Power in SE Europe	1112
12.1	The Status of Energy Efficiency in SE Europe	1113
12.1.1	Overview of EU Energy Efficiency Policy, Until 2020	1113
12.1.2	EU Legislation on Energy Efficiency	1115
12.1.3	National Energy and Climate Plans, NECP, for SE European Countries	1117
12.1.4	Incentives for the Promotion of Energy Efficiency in SE Europe	1122
12.1.5	EU- and IFI-funded Energy Efficiency Programmes in SE European countries	1127
12.2	The Status of Cogeneration of Heat and Power (CHP) in SE Europe	1131
12.2.1	Legislation on CHP in SE European States	1131
12.2.2	Installed CHP Capacity in SE Europe	1133
12.2.3	Incentives for the Promotion of CHP in SE Europe	1134
13	Energy Technology Perspectives in SE Europe	1138
13.1	The Role of Technologies in SE Europe's Energy Transition	1139
13.2	Clean Energy Technologies	1140
13.3	Review of Clean Energy Technologies in SE Europe	1141
13.4	The Role of Innovation	1175
13.5	Promoting Clean Energy Innovation	1177
13.6	Cybersecurity and Energy System Resilience	1181
14	Energy Demand and Supply Projections for SE Europe	1186
14.1	Introduction	1187
14.2	Projections for a "Baseline" Scenario	1188
14.2.1	Projections per Country	1188
14.2.2	Analysis per Group of Countries	1216
14.2.3	Electrification of the Transport Sector in SE Europe	1219
14.3	Discussion	1220
14.4	Summaries of Projections per Country	1221
15	Investment Potential in the Energy Sector of SE Europe	1308
15.1	Methodology	1309
15.2	Regional Investment Outlook	1309
15.3	Energy Efficiency and Energy Transition	1320
15.4	Energy Investments and Cost of Capital	1321
15.5	Cost Assumptions for Energy Projects in SE Europe	1329
15.6	Energy Investment Outlook per Country and per Sector	1331
15.7	Cross Border Energy Projects	1339
15.8	Total Investment Estimates	1341
15.9	Business Opportunities	1343
16	Key Messages	1352
Annexes		1358
I.	List of Acronyms and Unit Abbreviations	1358
II.	Energy Balances of Countries	1361
III.	Bibliography	1376
IV.	Sponsors' and Supporters' Profiles	1380
